Overview

- Purpose of Medical Materiel Standardization
- Military Healthcare System (MHS) Medical Materiel Standardization Programs
- Organizational Structure & Relationships
- Program Methods & Outcome Measures
- Future Plans

Purpose of Medical Materiel Standardization

- Patient Safety & Sustainability
 - Operational Interoperability
 - Operational Compatibility
 - Operational Supportability
- Cost Reduction
 - Economies of scale
 - Reduced logistics tail

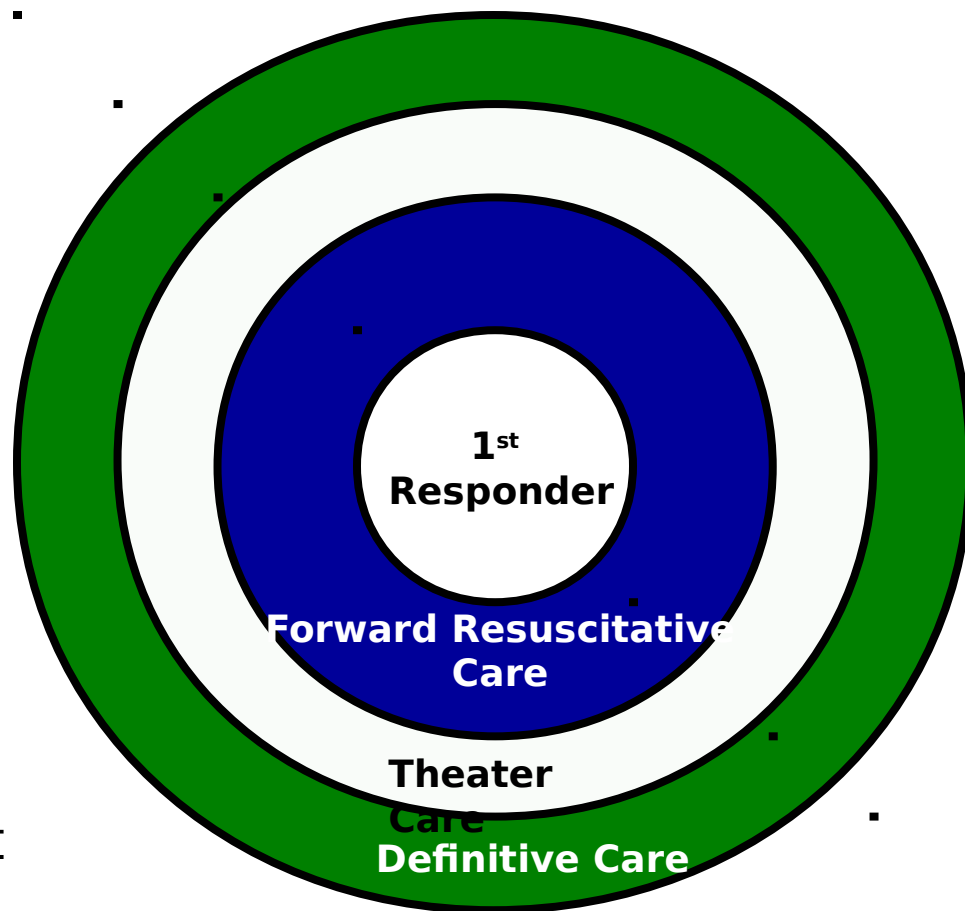

Operational Capabilities of Care

The concentric rings represent the Level or Capability of Care.

Medical capabilities are progressively enhanced from the inner to the outermost ring.

Medical Materiel considerations:

What is the most suitable product for the inner most level of care that requires that medical capability?

Medical Materiel Standardization Programs

- Defense Medical Standardization Board (DMSB)
 - DMSB Staff Office
- Pharmacy Benefits Program under Director, TRICARE Management Activity
 - DoD Pharmacy & Therapeutics Committee
 - Beneficiary Advisory Group
 - DoD Pharmacy Board of Advisors
 - Pharmacoeconomic Center (PEC)
- MHS Multi-Service Market Managers (MSMMs)
 - TRICARE Regional Business Offices

Medical Materiel Standardization Programs

Program	Est.	Current Policy or Guidance
DMSB	1945	<ul style="list-style-type: none">• DoDD 6000.12, 29 April 1996• DoDI 6430.2, 17 March 1997
Pharmacy Benefits Program	1998	<ul style="list-style-type: none">• Title 10 USC Sec. 1074g• 32 CFR Part 199
MSMMs	1998	<ul style="list-style-type: none">• Deputy SECDEF TRICARE Governance Policy Memorandum, 20 January 2004• Tri-Service Regional Medical Logistics Support Programs Implementation

Multi-Service Market Managers (MSMMs)

**Defense Medical Standardization
Board**

Tri-Service Regional Business Offices (TRBOs)

Overseas Pacific
1-888-777-8343

Europe: 1-888-777-8343

Latin America and Canada
and US Territories: 1-888-777-8343

Organizational Chart: Department of Defense, Office of the Assistant Secretary for Health (ASD/HA)

Top Level: Senior Military Medical Advisory Council, ASD/HA Director/TMA, Beneficiary Advisory Panel

Second Level: Deputy Dir /TMA, DASD(C&PP) CMO/TMA, DASD(FHP&R) Deployment Hlth Support/TMA

Third Level: TRICARE Advisory Committee, TRICARE Reg Directors (3) (SES/Flag), TRICARE Overseas Reg Offices (3), Pharmacy Operations Directorate, Clinical Proponency Steering Cte, Force Health Protection Council

Fourth Level: TRICARE Reg Advisory Committees, Multi-Service Market Managers*, TRO Deputy Director, PEC, DoD P&T Committee, DMSB, DMSB Staff Office

Fifth Level: Tri-Service Regional Business Office, Tri-Service Regional Business Office, DoD Pharmacy Board of Advisors, MLPC, Clinical SME Product Selection Panels

Sixth Level: Tri-Service Product Review Board, Tri-Service Product Review Board, ESC: Combatant & Component Commanders, Clinical Product Teams, Clinical Product Teams

Key: Focal Points for Standardization (indicated by red ovals)

Legend: Red ovals indicate Focal Points for Standardization.

Key:  **Focal Points for Standardization**

Operational Forces Touch Points

Program Methods: Similarities

- Clinical SME Panels
- User preference in conjunction with scientific evidence
- Market analysis
- Executive (SES/Flag) review

Program Methods: Differences

Program	Focus of Standardization Efforts
DMSB	Medical commodities (all categories) to meet operational compatibility and interoperability requirements
Pharmacy Benefits Program	Pharmaceuticals to provide uniform services and “best value” for beneficiaries of the MHS
MSMMs	Medical materiel (primarily consumables) to provide “best value” products for the direct care system

Program Methods: Differences

	Operational	Direct Care	Purchased Care
Med/Surg Supplies	DMSB	MSMMs	N/A
Equipment	DMSB	MSMMs	N/A
Pharmaceuticals	DMSB	Pharmacy Benefits Program	Pharmacy Benefits Program

- Efforts are complimentary
- Redundancies are avoided
- Collaboration across programs is mutually beneficial

Outcome Measures: DMSB

Medical Contingency File (MCF) Growth

2006

Future Direction

- Institutionalize evidence-based, data driven standardization processes
- Increase collaboration across the spectrum of medical materiel program activities
 - Visibility of program activities
 - Data sharing
 - Standardize processes and methodologies
- Improved standardization metrics
- Emergence of an overarching integration or coordination function at the DoD or Joint Services level
